📍 Belterstr. 23, Leipzig

## EDUCATION

**Secondary Education**
**Euskal-Echea**
2001 - 2006

**Business Administration**
**Universidad de Buenos Aires (UBA)**
2007 - 2011 (unfinished)

## SKILLS

- **Cloud**: AWS (Lambda, Amplify, DynamoDB, Lex, S3, IAM)
- **Languages**: Python
- **Frameworks**: React, Node.js
- **Tools**: Git, GitHub, Amplify CLI, VS Code
- **Databases**: DynamoDB, SQL
- **APIs**: REST, GraphQL

## LANGUAGE

- Spanish (mother tongue)
- English (C1)
- German (B2)

## PROFIL

Cloud developer in training with a background in professional writing since 2013. Throughout my career, I have worked extensively with WordPress, social media, and digital marketing. Currently transitioning into the IT sector, specializing in AWS-based solutions (Amplify, Lambda, Lex, DynamoDB). I'm eager to join a team where I can combine my technical knowledge with strong communication and content creation skills.

## IT-PROJECTS

**1. Bucket List Tracker App (amplify-tracker-app)**
Developed a full-stack serverless application using React, AWS Amplify, GraphQL (AppSync), DynamoDB, and Cognito for user authentication. Users can register, log in, and manage personalized bucket lists with real-time cloud sync.

**2. Image Analysis with AWS Rekognition (aws-rekognition)**
Created a script that processes and analyzes uploaded images using AWS Rekognition. The project detects objects, faces, and labels for visual content classification. Focused on using the Python SDK (Boto3).

**3. Hotel Booking Chatbot (hotel-booking-chatbot)**
Designed a chatbot for hotel reservations using Amazon Lex, AWS Lambda, and Amazon Translate. The bot supports multilingual input and handles booking intent with dynamic slot fulfillment via Python.

**4. Text to Audio Converter (text-to-audio)**
Developed a simple tool that converts input text into spoken audio using Amazon Polly. Useful for accessibility and content narration. Built with Python and Boto3.

## CERTIFICATION

**AWS Cloud Practitioner Essentials** – AWS Skill Builder – 2025
